

Owner's Manual

www.beinghumanecycle.com

Hello and a hearty welcome to the Being Human e-Cycle community!

Thank you for making our e-Cycle your product of choice! Your purchase has helped us get one step closer to a greener environment.

With the e-Cycle, you can look forward to zero fuel costs, fun commutes and a new way to appreciate nature.

To get even more enjoyment out of your e-Cycle, we recommend reading the entire user manual. It provides all the instructions required to correctly (and safely!) use and maintain your e-Cycle. We recommend keeping this manual handy for future reference.

Happy riding!

Important Safety Instructions

Rules of the Road

WARNING: Failure to obey the *Rules of the Road* can result in injury to yourself or to others.

- Follow your local traffic regulations, signs, and signals.
- Always wear a helmet, and knee and elbow guards.
- Cycle on the correct side of the road.
- Avoid riding when visibility is poor.
- Ride cautiously in wet weather as tires will slide more easily.
- Do not carry passengers.
- Do not attach items to your e-Cycle that could hinder your vision, hearing, or control.
- Always ride with both hands on the handlebar.

Your Responsibility

- Get all worn or broken parts replaced immediately.
- Do not ride if any part of your e-Cycle does not work properly.
- Pay attention to the safety of yourself and others when riding.
- Read all the driving guidelines given in this manual.

Most Important Rules

- Do not try to take apart any electrical parts such as the motor or battery by yourself. Please contact or visit your local, authorized distributor/ dealer or Being Human service center to check for wear of parts, or to lubricate components. Find your closest local, authorized distributor/ dealer or Being Human service center on www.beinghumancycle.com
- Before riding, ensure that the motor is securely assembled. If found to be loose, get in touch with your local, authorized distributor/ dealer or Being Human service center.

Identifying the Main Components

Pre-Ride Checklist

This checklist contains the basic conditions for a safe ride. Kindly ensure that your answer to each of the following questions is “Yes” before embarking on your e-Cycle adventure.

No	Description	Yes	No
01	<p>Are the front and rear brakes properly adjusted?</p> <p>To check</p> <ul style="list-style-type: none"> Squeeze the front brake lever (left) and the rear brake lever (right). <p>Note: Your e-Cycle should be at a standstill and the center stand should be in the upright position.</p> <ul style="list-style-type: none"> Apply full pressure to one pedal. <p>The e-Cycle should not move forward if the brakes are properly adjusted.</p>	<input type="checkbox"/>	<input type="checkbox"/>
02	Are the handle stem and the seat post fully tightened?	<input type="checkbox"/>	<input type="checkbox"/>
03	<p>Are the wires free and clear?</p> <p>Note</p> <ul style="list-style-type: none"> Entangled wires could result in the brake being applied unexpectedly or not working properly. 	<input type="checkbox"/>	<input type="checkbox"/>
04	<p>Is the front and rear wheel secure?</p> <p>To check</p> <ul style="list-style-type: none"> See if the hub nuts on the front wheel (quick release) and rear wheel (19 mm nut) are tightly fastened. 	<input type="checkbox"/>	<input type="checkbox"/>
05	<p>Is the tyre pressure correct?</p> <p>Note</p> <ul style="list-style-type: none"> The tyre pressure can be found on the tyres' sidewall. Be careful to not overinflate the tyres. The tyre pressure for BH12, BH27 – 30 Psi (both tyres on a city road) 	<input type="checkbox"/>	<input type="checkbox"/>
06	<p>Are the seat quick-release clamp, seat and seat post secure?</p> <p>Note</p> <ul style="list-style-type: none"> Physically check to ensure that the seat and seat post do not have any movement. Ensure that the minimum insertion mark on the seat post can't be seen beyond the bike frame. If you can't tell whether the seat post is secure, loosen it (use the quick release), and then fasten it again. 	<input type="checkbox"/>	<input type="checkbox"/>
07	Are the pedals and the crank secure?	<input type="checkbox"/>	<input type="checkbox"/>
08	Are the side reflectors in place and free from damage and contamination?	<input type="checkbox"/>	<input type="checkbox"/>
09	Are the frame and the front fork free from any deformation?	<input type="checkbox"/>	<input type="checkbox"/>
10	Are the front wheel and the handlebars set in the correct orientation?	<input type="checkbox"/>	<input type="checkbox"/>

11	Are your pants properly secured to your leg? Note • Avoid wearing loose-fitting pants while riding.	<input type="checkbox"/>	<input type="checkbox"/>
12	Are you wearing all your protective gear? Note • Protective gear includes safety wear items like a helmet, biking gloves, knee and elbow guards, etc. • Protective gear should be worn every time you ride your e-Cycle.	<input type="checkbox"/>	<input type="checkbox"/>
13	Is the seat post, handle stem bar, pedal, hub nut, brake lever (front and back), chain and rear derailleur well lubricated? Refer to the image below to see the parts that require lubrication. Note • Parts that are not well lubricated may not function smoothly.	<input type="checkbox"/>	<input type="checkbox"/>

IMPORTANT

Certain parts of your e-Cycle must not be lubricated. If the tyres or brakes are lubricated by mistake, the cycle may slip while riding, and the brakes will not function.

Refer to the image below to see the parts that should never be lubricated.

Safety Instructions for Riding Your E-cycle

Do not ride with another passenger standing behind.

Do not try stunts like wheelies, jumps, and riding down stairs.

Do not ride if you have consumed alcohol, drugs or any other substance that could have impaired your judgement.

Do not walk a pet while riding. Keep your hands free to ride.

Do not ride on rough or uneven roads.

Do not use your E-Cycle as a stool.

Do not apply only the front brake.

Do not brake abruptly on wet or icy roads.

Do not ride with the kickstand down.

Do not ride with heavy loads.

Avoid wearing loose-fitting clothing that might get caught in the e-bike's chain or in other parts.

How to Operate Your e-Cycle

E-Cycle Modes:

- You can use your e-Cycle in two modes:
 - Pedal-Assist Mode (Only for Model BH27)
 - Throttle Mode

Instructions:

- Switch on your e-Cycle. The default mode for switching the e-Cycle on is the 'M' button on the LCD/LED.
- To start the Pedal-Assist Mode, begin pedaling slowing on Pedal-Assist Mode "1". This is recommended to avoid accidents and sudden acceleration.
- To stop press either of the brakes.
- To start the Throttle Mode, change the mode to '0' from default pedal assist mode '1'.

Important: Pedal-Assistance will not function when Mode "0" has been set.)

Remember:

- Pedal-Assist Mode has 5 Modes (1, 2, 3, 4 and 5), with level 1 being the lowest assist level and Level 5 the highest.
- To change the Pedal-Assist Mode level, use the '+' and '-' buttons.
- To change from kilometers per hour to miles per hour or the other way around, press the '+' and '-' buttons together for 4-5 seconds. (The '+' and '-' buttons are found on the Pedal Assist Control Module.)
- To activate Walking Mode, press the '+' button and hold for as long as you want this mode. To end the Walking Mode, release the '+' button.
- To reset the trip odometer, press down on the '-' button for about 3 seconds.

* Please note, the combination of Pedal-Assist Mode and Throttle feature is limited to the BH27 models. The other model only offers the throttle feature.

How to Recharge the Battery

Step 1

Ensure that the battery is installed to the frame. Then, connect the charger to the charging slot.

Step 2

Connect the charger to a 220v power outlet.

Step 3

Wait until the battery is completely charged. The coloured LED lights will help you monitor the charging progress. A red light indicates that the battery is still charging. A green light indicates that the charging is complete.

Step 4

Disconnect the charger from the power outlet. Then disconnect the charging cable from the charging slot.

Important

- Do not move the e-Cycle and the charger while the charging is on.
- Charging should be carried out in a well-ventilated environment that is free from moisture.
- Ensure that there are no flammable or explosive items placed near the charger.
- Keep the charger well out of the reach of children.
- Use only the certified charger that was provided with your e-Cycle.
- Read and follow the all charging instructions provided.
- To enjoy extended battery life, recharge the battery as soon as it has discharged.

Model BH27 comes with an LCD monitor.

The LCD display offers a number of functions designed to satisfy your requirements. Its features include: it can be pictorially explained which is given down.

- Battery level indicator
- Motor output indication
- Assistance level indication
- Speed indication:
- Current
- Maximum
- Average
- Trip time
- Trip distance
- Total distance
- Push Assistance function
- On/Off lighting
- Error code indication
- Parameter settings:
- Wheel diameter
- Speed limit
- Battery level bar
- Assistance level
- Current limit
- Maximum speed
- Password Enable
- Recover default setting

FAQs

1. Where can I ride my e-Cycle?

You can ride your e-Cycle on any kind of road, including inclines.

2. Do I need a license to ride my e-Cycle on the road?

No, you do not require any license to ride your e-Cycle.

3. Will my e-Cycle recharge while I pedal?

No, your e-Cycle will not recharge while you pedal.

4. How long will the battery take to recharge?

The battery will take between 3 to 4 hours to recharge.

5. How should I look after my battery?

Avoid any damage or water seepage to the battery.

6. Should I completely drain the battery before charging it?

Though you can charge the battery anytime, letting the battery drain up to 10% before charging it is recommended.

7. What are the different e-Cycle models that you offer?

We offer two e-Cycle models - BH12 and BH27.

8. Do your e-Cycles have a pedal or a throttle?

All our e-Cycle models have both, a pedal as well as a throttle.

9. How fast will my e-Cycle go?

The maximum speed is up to 25 km/hr.

10. How should I clean my e-Cycle?

Clean your e-Cycle with a normal, damp cloth. Don't splash water on the e-Cycle.

11. Can I put my e-Cycle on a car rack?

Yes. You can place your e-Cycle on a car rack.

12. How much does the e-Cycle weigh?

e-Cycle model BH12 weights 22 kgs while BH27 weights 23 kgs.

13. How often should the e-Cycle be inspected?

It is recommended that your e-Cycle be inspected at least once in a quarter. Ensure that the inspection is carried out by an authorized Being Human dealer or Being Human Service Center.

Disclaimer

All equipment and models are described without indicating whether the equipment is optional or specific to the model type. This means that your vehicle may not have some of the equipment as described, or it may only be available in certain markets. The scope of equipment fitted in your vehicle can be found in the sales documentation and you can contact your Being Human E-cycle dealership for further information.
